**Subject:** Re: RM 10.9 QAPP D Response to Comments

Hi Stan,

I have requested comments on this by COB tomorrow. Assuming there's nothing too significant, I'm hoping this works with your schedule.

Thanks,  
Stephanie

Subject: RM 10.9 QAPP D Response to Comments

Stephanie,

Attached for review is CPG's proposed "Response to Comments" based on feedback received from both USEPA and NJDEP on QAPP Addendum D. I am also attaching a red-lined version of the QAPP Addendum D showing the location and text of all proposed revisions. The main changes between Rev 0 and Rev 1 include:

1. Collection of additional sediment cores for generation of two pore water composite samples;
2. Text modifications and new figures to improve clarity regarding the sampling program;
3. Correction of the units error in Worksheet #15; and,
4. Addition of two new laboratory SOPs (ASL and Brooks Rand) related to decontamination of containers and sample handling during sediment centrifugation for extraction of pore water.

If the proposed "Response to Comments" is acceptable, we will forward a clean version of the QAPP Addendum D for signature and plan to mobilize our sampling team for the week of January 28.

If you or your team have any questions, please call me. Thanks.
